

FOR IMMEDIATE RELEASE

Blade Solution Corp announces their international launch of the REVOsafe™ system with shipments to Australia and New Zealand.

SULPHUR SPRINGS, ARK., - September 11, 2025 – Blade Solution Corp, the manufacturer of the REVOsafe™ system, is now shipping internationally to Australia and New Zealand, just in time for their Spring season. Customers can visit www.safemowing.com and order the REVO6 2.0 hub and line package which provides a safer and more eco-friendly alternative to metal mower blades. Compatible with all mower types from push mowers to riding and zero-turn mowers, the REVOsafe™ technology can be installed by the customer in a matter of minutes.

“2025 has been a great year for us as we have quadrupled our sales volumes from 2024. We are very excited about expanding our business internationally”, said Steve Harari, Blade Solution VP of Finance and Marketing. Available packages range from those for small lawns up to those for mowing several acres of property. Packages are also available for commercial landscapers.

“Some of our customers have said they will never go back to metal blades”, said Richard Nevels, company founder and CEO. Nevels conceived the patent-pending REVOsafe™ system while mowing his property in rural Arkansas which is full of rocks and uneven ground. With 85,000 mower related accidents reported annually in the U.S., the REVOsafe™ system is designed to prevent the hundreds of amputations and very serious injuries that occur from contact with metal blades.

About Blade Solution Corp

Founded on a passion for innovation and safety, Blade Solution Corp. is the company behind REVOsafe™, a patent-pending line-based mowing system designed to revolutionize lawn care. Learn more at www.safemowing.com.
