Fusion5 bolsters NetSuite resources with Applejack acquisition

15 September – Sydney, Australia. Australasian systems integrator Fusion5 has announced the acquisition of Applejack, one of Australia’s longest-operating NetSuite partners.

Applejack is a Queensland-based provider of NetSuite, Oracle’s leading Cloud ERP Business Management Software Suite. Applejack customers include Mountain Bikes Direct, Scape Student Living, and Salary Packaging Australia.

“Becoming part of Fusion5 is an exciting move for both our team and our customers,” says Applejack Founder and Managing Director, Stuart Mallet. “It’s an opportunity for our consultants to work on a wider range of projects, and for our customers to leverage Fusion5’s extensive investment in their data, security, AI, and integration capabilities.”

Sven Martin, Fusion5 Australia’s CEO, says. “We’re delighted to add their skills and expertise to our own, build our presence in Brisbane, and offer a wide range of transformation services to its customers from under one roof.”

The acquisition of Applejack supports Fusion5’s broader systems integrator strategy. “We’re focused on growth across the board – from building a significant AI (artificial intelligence) team to investing heavily in our data practice and bringing in vertical capabilities that can be applied throughout the business,” says Martin.

Applejack officially becomes part of Fusion5 on 15 September 2025.
