## **Overview:**

Aegis Sales & Service will showcase the Blackline Safety G8 connected wearable at the 2026 Workplace Health & Safety Show in Brisbane. Located at Stand H20, the exhibit focuses on the latest advancements in real-time gas detection and automated lone worker protection systems. The event serves as a critical demonstration of how integrated cellular and satellite connectivity is redefining safety standards for high-risk Australian industries.

## **MEDIA ALERT**

### **FOR IMMEDIATE DISTRIBUTION**

Tuesday 24th March 2026

**HEADLINE:** Aegis Sales & Service to Showcase Next-Gen 'G8' Connected Safety Tech at Queensland's Premier Workplace Health & Safety Show

**Brisbane, Queensland** – [Aegis Sales & Service](#), a leader in specialized safety solutions, has officially announced its participation in the [Workplace Health & Safety Show](#), held this week at the Brisbane Convention and Exhibition Centre.

As industries across Australia face evolving challenges in workforce protection, Aegis will be demonstrating the future of connected safety with the Blackline Safety Range.

The showcase will feature the highly anticipated [Blackline G8 Connected Multi Gas Detector](#) connected safety wearable, it represents a breakthrough in portable gas detection and lone worker protection designed to bridge the gap between field data and real-time emergency response.

"Ensuring every worker returns home safely requires more than just reactive equipment; it requires real-time connectivity," said Aegis Sales & Service General Manager, Kimberley Nunn.

"Bringing the G8 to Brisbane allows us to show health and safety managers exactly how they can transform their lone worker protocols from traditional check-ins to live, monitored safety nets."

## Event Details for Attendees:

-  **Location:** Visit Aegis Sales & Service at **Stand H20**
-  **Event:** Workplace Health & Safety Show
-  **Venue:** Brisbane Convention and Exhibition Centre
-  **Dates:** Wednesday 25 - Thursday 26 March 2026
-  **Focus:** Lone worker safety, portable gas detection, and the G8 live demonstration.

Attendees responsible for safety in high-risk environments, telecommunications, utilities, and mining are encouraged to visit Stand H20 for a live walkthrough of the Blackline ecosystem, which integrates satellite/cellular connectivity with gas sensing technology to ensure no worker is ever truly alone.

## About Aegis Sales & Service

For over four decades, Aegis Sales & Service has stood as a pillar of reliability and expertise within the Australian industrial safety landscape. Established in June 1984 by Robert and Eileen Colhoun, the business has evolved from a local family-owned operation in Brisbane into a nationwide leader in safety products, technical instrumentation, and specialised maintenance services.

Aegis Sales & Service is recognised not just for its extensive product catalog but for its deep technical capability, offering a holistic "sales and service" model that ensures Australian workers return home safely every day.

As a key supporter of industry, Aegis Sales & Service is also a major sponsor of the Queensland Operator of the Year Award at the annual [WIOA](#) exhibition, reinforcing its commitment to recognising and uplifting Australian organisations making significant contributions to workplace safety.

Today, Aegis Sales & Service, services more than 2,000 customers nationwide, ranging from small independent operators to major oil and gas organisations such as Santos, QGC and Origin Energy. Clients span the resources sector, councils and utilities, government agencies, large commercial and industrial operators, and national retail portfolios including Aldi, Qantas and Brisbane City Council.
