

UniPhi Incorporates in Canada

The UniPhi Group has expanded its presence in North America by incorporating in Vancouver, Canada. UniPhi (CA) Limited was created on 12th March and new staff will be on-boarded into this company over the coming months.

The UniPhi Group already supports over USD10bn in major projects across the USA, Canada, and Brazil. This expanded organisational footprint will allow the group to provide more aligned sales support services to the organisations utilising the UniPhi platform currently or interested in doing so.

UniPhi's Group CEO and Founder, Mark Heath stated: "This is a major milestone in the globalisation of the UniPhi brand and platform. Our end users in the Americas will now have a local presence to contextualise their requirements to our portfolio and project management platform."

UniPhi Canada joins UniPhi (Aus), UniPhi (UK), and UniPhi HK to complete a global footprint of support services.

"UniPhi is a highly configurable platform and it's in our ability to match the nuances of a regional or project type requirement that differentiates us from the constraints of other platform products in the market. This new Americas base will enhance our capabilities to support one of the largest and most dynamic regions of the world" Heath added.

About UniPhi

UniPhi is an award winning cloud-based project and portfolio management software platform. Headquartered in Sydney, Australia and with offices in London, Vancouver and Hong Kong, the UniPhi Group is able to provide 24x7 support to over AUD100bn worth of project investment around the world. Designed for efficiency and flexibility, UniPhi enables organisations to manage complex projects with real-time data and seamless system integration. UniPhi simplifies financial tracking, enhances project oversight, and streamlines reporting.
