

Introducing Euromate Pure Air!

Euromate Pure Air are entering the Australian and South Pacific market as exclusive distributors of Euromate air cleaning and filtration products.

We are specialists in air cleaning and filtration, helping organizations and people to improve their indoor air quality, because we believe that clean indoor air is a substantial right for everyone and the basis for a happy and healthy life.

Our specialised systems provide protection against viruses (including COVID-19) as well as bacteria, aerosols, fine dust, odours and smoke.

Recent independent research by the reputable VTT (Technical Research Centre of Finland) and the conclusion from TNO (Netherlands Organisation for applied scientific research) has shown that, the VisionAir Blue Line MicrobeFree air cleaner with its combination of HEPA filters, silver ion filters and UV-C light, removes coronaviruses that are transported by aerosols from the air and makes them harmless.

Our experience, expertise and service orientation in air cleaners make it possible in every situation to deliver a device which is effective, sustainable and user friendly. Euromate is a leading global supplier of air cleaners and we are proud to bring this innovative technology to the APac market.

Contact us today to enquire about our products, or to become a commercial dealer.
